University Financial Treasurer

John Onger

Software Engineer | Ex-Google Extern (ALU Industry Partnership)
| UN IOM Climate Tech | ML & Backend Systems | Mastercard
Foundation Scholar @ ALU | Python • Mobile Application
Development • AWS • Distributed Systems

Nairobi, Nairobi County, Kenya

Summary

I solve problems institutions pay millions to solve. By 23, I've engineered inside Google's ecosystem through ALU's most competitive industry partnership, built technical tooling for the United Nations' global climate mandate at IOM-UN in Nairobi, and architected data infrastructure tracking impact across 500+ beneficiaries for Menya Accelerator in partnership with African Leadership Academy, all while completing a Software Engineering degree on a full Mastercard Foundation Scholarship at one of Africa's most selective universities. What I've actually shipped:→ Google (ALU Industry Partnership): Built a production data-processing module handling 5,600+ structured records with 18 automated test cases. Code-reviewed 3 engineers and intercepted 11 critical logic errors before deployment.→ UN IOM (Climate Action): Engineered data workflows and technical reporting tools supporting the UN's global climate displacement mandate.→ Equity Bank: Processed transactions for 100+ customers daily on East Africa's largest fintech core banking system zero reconciliation errors. Background that built me: First-generation university student. Wings to Fly Scholar. Equity Leaders Program Scholar. Mastercard Foundation Scholar. Every credential earned, none inherited. johnongeriouma@gmail.com <https://github.com/JohnOnger>

Experience

IOM - UN Migration

Intern

April 2026 - Present (2 months)

Nairobi County, Kenya

Built Python and SQL automation workflows processing 12,000+ climate mobility and displacement records across regional reporting programmes.

Reduced manual reporting time from 6 hours to under 2 hours by developing automated data cleaning and reporting scripts for field operations teams.

Maintained data pipelines and dashboards tracking 20+ climate action indicators used in programme monitoring and donor reporting.

Collaborated with 8+ programme and research staff to improve data accuracy, reporting consistency, and operational workflow efficiency across climate action initiatives.

Asakheni SA

Founder's Associate | Research Operations & AI Systems

January 2026 - Present (5 months)

South Africa

Built and maintained 12+ AI-powered operational workflows using Python, Claude, Zapier, and Make.com, automating internal processes across reporting, document generation, stakeholder communication, and data capture.

Reduced manual administrative workload by approximately 25 hours per month by developing automated reporting pipelines and internal operational systems for programme and business management.

Managed and maintained 8+ operational trackers and dashboards covering partnership pipelines, programme KPIs, funding opportunities, meeting action logs, and monitoring & evaluation reporting.

Supported the preparation of 20+ strategic documents including funding proposals, concept notes, research briefs, investor materials, and external stakeholder communications for social-impact and commercialisation initiatives.

Conducted research and market analysis across 15+ potential funders, ecosystem partners, and EdTech opportunities, contributing to partnership development and strategic growth planning.

Coordinated cross-functional operations across 5+ concurrent projects, ensuring timely execution of programme deliverables, partner follow-ups, reporting cycles, and founder priorities.

Designed and documented internal systems and workflows for onboarding, project management, reporting, and operational coordination, improving execution consistency within a fast-moving startup environment.

Served as the technical and operational bridge between business strategy, research operations, and AI automation initiatives, contributing to the scaling of internal infrastructure and process efficiency.

Google

Software Engineering Extern

September 2025 - December 2025 (4 months)

Nairobi County, Kenya

Engineered a production data-processing module ingesting 5,600+ structured records, hardened with 18 automated test cases, zero post-deployment defects across the cohort review.

Code-reviewed 3 engineers' pull requests, intercepting 11 critical logic errors before deployment, set the QA bar within the cohort.

Built modular Python pipelines to Google engineering standards: clean separation of concerns, defensive error handling, full test coverage.

Selected into one of ALU's most competitive industry placements, operated inside Google's mentorship framework alongside FAANG engineers.

African Leadership Academy

ALforEducation Apprentice

May 2025 - August 2025 (4 months)

South Africa

Architected a 5-part Monitoring & Evaluation framework tracking impact across 500+ beneficiaries in Opportunities and Entrepreneurship programs adopted organization-wide.

Engineered 10+ reusable reporting templates and structured data-collection systems, accelerating monthly and quarterly assessment cycles for 3 distributed field teams.

Defined and validated 15 key program indicators (cohort completion rates, jobs created) converted leadership instinct into measurable, scalable signal.

Compressed feedback loops by 20% via structured stakeholder reporting directly seeded the strategic concept that became Menya Academy.

Featured in Menya's official newsletter amplified work to 1,000+ stakeholders across the African development ecosystem.

The African Leadership University

ALU Student Representative Council Financial Treasurer and Integrity Board Member

March 2024 - February 2025 (1 year)

Gasabo District

Owned the books for the entire ALU student body — sole signatory on every financial transaction across a year-long term.

Authored and enforced the SRC's budgetary and financial policies — controls that survived a leadership transition with zero discrepancies.

Delivered termly financial statements with full audit transparency to a campus of hundreds

Equity Group Foundation

College Counselor

May 2023 - July 2023 (3 months)

Kenya

Coached high school graduates from Kenya, Uganda, Rwanda, and DRC into fully-funded global scholarships — direct pipeline into top universities worldwide.

Reviewed and rebuilt scholarship essays line-by-line, raising acceptance signal across a 4-country applicant pool.

Engineered targeted SAT prep strategies, compressing student test-prep timelines.

Independent Electoral and Boundaries Commission

Polling Clerk

July 2022 - August 2022 (2 months)

Malindi

Operated the Kenya Integrated Election Management System (KIEMS) real-time biometric voter verification at national-election scale.

Managed polling-station flow under strict regulatory compliance during one of Kenya's highest-stakes democratic events.

Equity Bank Limited

Pre University Intern (Equity Leaders Program Scholar)

May 2021 - September 2021 (5 months)

Malindi

Processed cash transactions for 100+ customers daily through Equity's core banking system zero reconciliation errors.

Built and maintained financial records and inventory ledgers early hands-on exposure to the fintech operations stack powering East Africa's largest bank by customer count.

Originated customer bank accounts end-to-end through Equity's KYC and onboarding systems.

Education

The African Leadership University

Software engineering, Computer Software Engineering · (May 2023 - July 2026)

Kisii School

· (January 2017 - April 2021)
